Agile Backlog Creation & Sprint Simulation in Jira

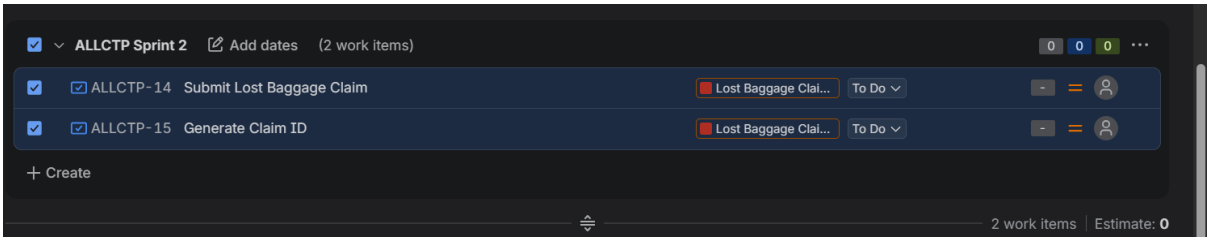

1. LIST OF EPICS

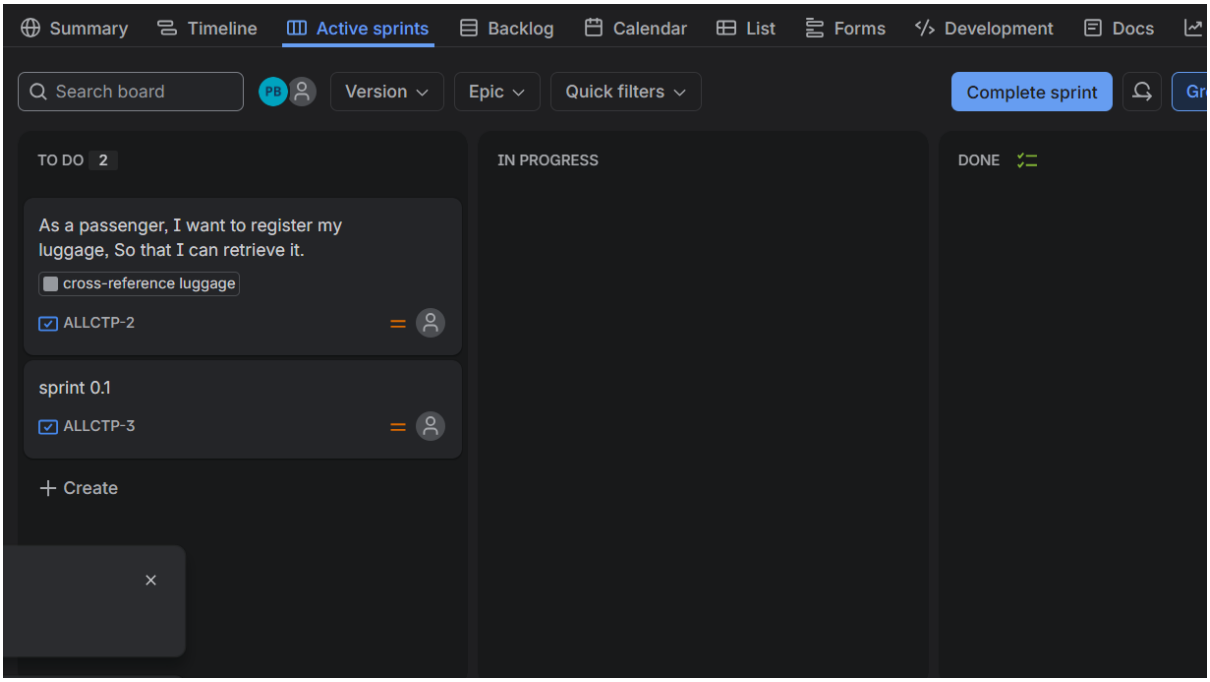

2. LIST OF USER STORIES UNDER AN EPIC

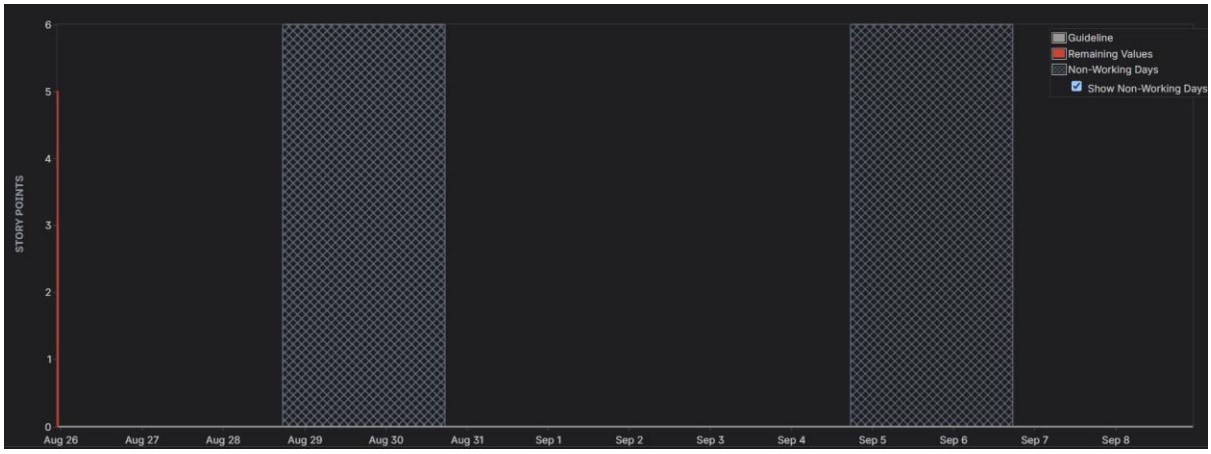

3. CREATING A SPRINT

4. ACTIVE SPRINT

5. BURNDOWN CHART

Reflection Questions:

1. Was your backlog well-prioritized?

   Yes, the backlog was prioritized based on the importance and impact of the functionality. Core features such as submitting a lost baggage claim, matching baggage to claims, and tracking baggage were given higher priority, while features such as compensation and expedited review were given lower priority. This allowed the essential functionality to be considered first.

2. How did your simulated sprint align with your plan?

   The simulated sprint partially aligned with the original plan. The selected user stories were moved through the Scrum workflow from To Do to In Progress and Done.

4. What insights did the burndown chart give about your team's capacity?
